Summary

Software Engineer with nearly 2 years of experience building scalable web applications, real-time AI voice agents, and telephony SaaS products using ReactJS, TypeScript, Node.js, and cloud technologies. Experienced in developing reusable UI components, integrating voice engines (TTS/STT), and building communication backends with FreeSWITCH, Twilio, and Plivo. Hands-on with multi-tenant systems, caching layers, and real-time dashboards in agile teams.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript
Telephony & AI: FreeSWITCH, VoIP, Text-to-Speech (TTS), Speech-to-Text (STT), ElevenLabs, OpenAI, Twilio, Plivo
Frontend: ReactJS, HTML5, CSS3, Tailwind CSS, Shadcn UI, Responsive Design
State Management: Context API, TanStack Query (React Query), Redux Toolkit (familiar)
Backend: Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Drizzle ORM
API Integration: REST APIs, Axios, WebSockets, Real-Time Data Handling
Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, CI/CD Pipelines, Git, GitHub
Authentication & Security: JWT, OAuth 2.0, Role-Based Access Control (RBAC)

Experience

Freelance Software Developer Aug 2026 – Present
PrimeXSphere – primexsphere.com *Greater Noida, India*

- Run PrimeXSphere, a freelance practice delivering custom web applications, AI solutions, and automation systems for businesses.
- Designed, built, and deployed the PrimeXSphere website and product showcase.
- Handle projects end to end: requirement gathering, development, deployment, and client communication.

Software Engineer (Full-Stack) Mar 2026 – Aug 2026
Bisht Technologies – AgentLabs & AgentHR AI SaaS Platforms *Greater Noida, India*

- Architected and developed key modules for AgentLabs, a multi-tenant SaaS platform for AI-powered bulk calling, integrating ElevenLabs (TTS), OpenAI, Twilio, Plivo, and FreeSWITCH to support low-latency voice agents.
- Implemented real-time voice and call monitoring pipelines, configuring FreeSWITCH nodes and WebSockets to handle live Speech-to-Text (STT) and Text-to-Speech (TTS) streams.
- Developed and maintained a ReactJS application using TypeScript, Tailwind CSS, and Shadcn UI, delivering responsive and scalable user interfaces.
- Built reusable component libraries following design system principles, reducing development effort by 30% and ensuring UI consistency.
- Integrated REST APIs using TanStack Query for server-state management, caching, and background synchronization.
- Created analytics dashboards using Recharts to visualize call metrics, campaign performance, and agent productivity.
- Participated in code reviews, debugging, performance optimization, and deployments using Git workflows and CI/CD pipelines.

Web Developer Apr 2025 – Feb 2026
Snowebs Software Technologies Pvt. Ltd. *Greater Noida, India*

- Developed and maintained business web applications using ReactJS, Node.js, JavaScript, and MySQL.
- Built Payroll Management System modules including employee dashboards, attendance, leave tracking, payslip generation, and admin panels serving 500+ users.
- Developed backend REST APIs using Express.js and MySQL, covering CRUD operations, form processing, and business workflows.
- Implemented authentication and authorization using JWT and Role-Based Access Control (RBAC).
- Improved application performance through modular architecture, efficient API integration, and database query optimization.

ReactJS Developer – MERN Stack Oct 2024 – Mar 2025
BGM Game Pvt. Ltd. *Gurugram, Haryana, India*

- Developed a CRM platform using ReactJS, Node.js, Express.js, and MongoDB with reusable UI components and role-based dashboards.
- Built advanced search, dynamic forms, reusable tables, and responsive interfaces for business users.
- Implemented OTP-based authentication, protected routes, and role-based access controls.
- Collaborated with backend developers to integrate APIs between frontend and backend.

Key Projects

ApnaJob – AI-Powered Job Discovery Platform | lsd.qzz.io
ReactJS, TypeScript, Node.js, MongoDB, Tailwind CSS
- Developed an AI-driven career matching and job discovery web application connecting job seekers with job listings.
- Built job-matching and search logic with notifications for new opportunities.
- Implemented encryption controls for candidate profiles and secure data transmission for verified recruiters.

Real-Time Chat Application
ReactJS, Node.js, Socket.IO, MongoDB, Context API
- Developed a real-time chat application supporting instant messaging using Socket.IO and ReactJS.
- Managed state with Context API and optimized rendering for a smoother user experience.
- Built responsive UI components for desktop and mobile devices.

Education

B.Tech – Computer Science Engineering (AI/ML Specialization) 2020 – 2024
Greater Noida Institute of Technology, AKTU *Greater Noida, India*
