Summary

Software Engineer with 2+ years of experience building scalable web applications, real-time AI agents, and telephony SaaS products using ReactJS, JavaScript (ES6+), TypeScript, Node.js, and modern cloud technologies. Expert in developing reusable UI components, integrating voice engines (TTS/STT), and implementing high-throughput communication backends. Strong track record of designing multi-tenant systems, caching layers, and real-time dashboards under agile methodologies.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript
Telephony & AI: FreeSWITCH, VoIP, Text-to-Speech (TTS), Speech-to-Text (STT), ElevenLabs, OpenAI, Twilio, Plivo
Frontend: ReactJS, HTML5, CSS3, Tailwind CSS, Shadcn UI, Responsive Design, Cross-Browser Compatibility
State Management: Context API, TanStack Query (React Query), Redux Toolkit (Familiar)
Backend: Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Drizzle ORM
API Integration: REST APIs, Axios, WebSockets, Real-Time Data Handling
Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, CI/CD Pipelines, Git, GitHub
Authentication & Security: JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC)

Experience

Software Engineer (Full-Stack) Mar 2026 – Present
Bisht technologies – AgentLabs & AgentHR AI SaaS Platforms *Greater Noida, India*

- Architected and developed key modules for **AgentLabs**, a multi-tenant SaaS platform for AI-powered bulk calling, integrating ElevenLabs (TTS), OpenAI, Twilio, Plivo, and FreeSWITCH to support low-latency voice agents.
- Implemented real-time voice and call monitoring pipelines, configuring FreeSWITCH nodes and WebSockets to handle real-time Speech-to-Text (STT) and Text-to-Speech (TTS) transformations.
- Developed and maintained a high-performance ReactJS application using TypeScript, Tailwind CSS, and Shadcn UI, delivering responsive and scalable user interfaces.
- Built and maintained reusable component libraries following design system principles, reducing development effort by 30% and ensuring UI consistency.
- Integrated REST APIs using TanStack Query (React Query) for efficient server-state management, caching, and background synchronization.
- Created interactive analytics dashboards using Recharts to visualize call metrics, campaign performance, and agent productivity data.
- Participated in code reviews, debugging, performance optimization, and deployment processes using Git-based workflows and CI/CD pipelines.

Web Developer Apr 2025 – Feb 2026
Snowebs Software Technologies Pvt. Ltd. *Greater Noida, India*

- Developed and maintained business web applications using ReactJS, Node.js, JavaScript, HTML5, CSS3, and MySQL.
- Built responsive Payroll Management System modules including employee dashboards, attendance management, leave tracking, payslip generation, and administrative panels serving 500+ users.
- Developed backend REST APIs using Express.js and MySQL, implementing CRUD operations, form processing, secure database design, and business workflow implementation.
- Integrated RESTful APIs and third-party services to enable seamless communication between frontend and backend systems.
- Implemented secure authentication and authorization mechanisms using JWT and Role-Based Access Control (RBAC).
- Optimized application performance through modular architecture improvements, efficient API integration, and database query optimization.

ReactJS Developer – MERN Stack Oct 2024 – Mar 2025
BGM Game Pvt. Ltd. *Gurugram, Haryana, India*

- Developed a CRM platform using ReactJS, Node.js, Express.js, and MongoDB with reusable UI components and role-based dashboards.
- Built advanced search functionality, dynamic forms, reusable tables, and responsive interfaces for business users.
- Implemented OTP-based authentication, protected routes, and role-based access controls across the application.
- Collaborated with backend developers to integrate APIs and ensure seamless frontend-backend communication.

Key Projects

ApnaJob – AI-Powered Job Discovery Platform lsd.qzz.io | GitHub
ReactJS, TypeScript, Node.js, MongoDB, Tailwind CSS

- Developed **ApnaJob** (CareerSpriter), an AI-driven career matching and job discovery web application connecting job seekers with global listings.

- Engineered real-time job-matching algorithms, search logic for millions of listings, and notification systems for new opportunities.
- Implemented privacy-first encryption controls for candidate profiles and secure data transmission for verified recruiter leads.

Real-Time Chat Application *ReactJS, Node.js, Socket.IO, MongoDB, Context API*

- Developed a real-time chat application supporting instant messaging using Socket.IO and ReactJS.
- Implemented state management using Context API and optimized rendering for improved user experience.
- Built responsive UI components ensuring compatibility across desktop and mobile devices.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering (AI/ML Specialization) 2020 – 2024

Greater Noida Institute of Technology, Dr. A.P.J. Abdul Kalam Technical University (AKTU)
